

Subject: a:design2 - Version 4.2.0-R (build #41211)

Parts affected: ---

Related information:

Please be advised that a new release of a:design2 - Version 4.2.0-R (build #41211) will be available from December 11th, 2014.

Replaced Version: 4.0.0-R (build #40401)

Important notes for users:

All users are advised to read the contents of this document carefully and update all systems as soon as possible, unless explicitly advised against by an Allen Coding representative.

The software incorporates the features / bug fixes as detailed below:

Features:

No. / Bugzilla	What	Affected printer
1/302	Alphanumeric counters added	NGT-Series
2/403	Date tables added (extended substitution rules can have more than one character)	NGT-Series
3	QR-Code (GS1-QR-Code) implemented for NGT Firmware versions 8 or higher	NGT-Series
4	GS1-Databar (Omnidirectional, Truncated, Limited, Stacked, Stacked Omnidirectional, Expanded, Expanded Stacked) implemented for NGT Firmware versions 8 or higher	NGT-Series
5	Improved GS1 Barcode Assistant (including new AIs)	general
6	"Change to" / object conversions with right mouse click. (text field, variable field, date field, counter, barcode)	general
7	Formula as variables offset in DateTime fields usable	NGT-Series

Bug fixes:

No. / Bugzilla	What	Details	Affected printer
1/303	Bug fix EAN 128 Barcode position	EAN 128 with no human readable line had a wrong print position.	general
2/312	Bug fix selecting a printer	Printer settings were stored wrong if i.e. a printer on COM4 is selected and com port was not available.	general
3/393	Bug fix pdf import	Ghostscript path can be edited in program settings, if automatic determination failed.	general
4/410	Bug fix save document	LTI printer driver: print preview stored in printer's database is disabled now; new a:control uses LTU-concentra label parser for preview.	LT/XL-Series
5/396, 406	Bug fix translations	Minor language changes	general
6/402	Bug fix print preview	An empty image was shown	general

7/407, 408	Bug fix print document	- Document creation failed with message fillDocumentFactory - Document creation failed for some NGT formats with multiple lines	general
8	Bug fix print preview	Print preview had incorrect size	general
9/394	Bug fix RS-Fields	combination of RS-field and counter in a formula was not possible	LT/XL-Series
10/401, 411, 412	Bug fix DateTime fields	missing one digit year code added, two digit year code problem fixed, WYSIWYG fixed for "year 2 characters", "year 4 characters", delete year code and rename some fields for XL-printer driver	general
11/398	Bug fix Ribbon advance / Ribbon rewind	Editable in page setup	XL-Series
12/400	Bug fix variable prompt	Variable prompt on PR5 was wrong	XL-Series
13	Bug fix variable names	If two variables had the same prompt for input, only one of both variable input was requested	general
14	Bug fix QR Code	QR-code properties were reset when changing properties again	general
